

# Monocular usage manual

## Connect to a hand strap or a tripod

The screws on the monocular can be fixed on the hand strap. You can also use a wrench to remove the screws. The monocular uses 1/4 inch standard tripod thread, so it can be connected to a tripod or other base with 1/4" thread.

## 2. Twist up eyecap

If you are wearing glasses, you can rotate the rubber eyecup downward to get the best image.

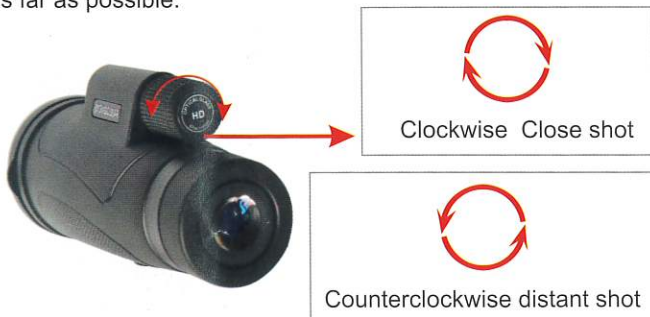

with glasses

without glasses

## 3. Focus

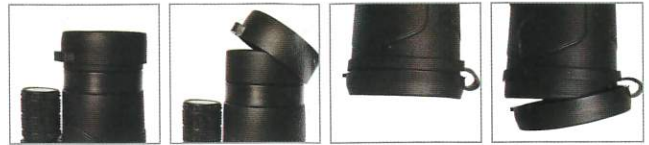

The purpose of this operation is to adjust the focus wheel to clockwise or counterclockwise to obtain a close shot or a distant shot. When making this adjustment, keep the distance as far as possible.

02

## 4. Lens caps

The cover can prevent lens dust, scratches, or squeezing. It can also be removed when using monocular.

## 5. Install

Adjust the position of the phone by adjusting the knob
